Address: Phu Thuan ward, Ho Chi Minh City

CAREER OBJECTIVE

Software Engineering graduate with hands-on experience in developing web applications and enterprise systems. I am seeking a Fresher Software Developer position to contribute to real-world projects, apply my technical skills, and continue growing as a professional software engineer.

SKILLS

- Database: MongoDB.
- Tools: Figma, Postman, Docker.
- Languages: JavaScript, TypeScript, Python.
- Front-end: React, HTML5, CSS3, Tailwind CSS.
- CMS & Platforms: WordPress.

WORK EXPERIENCE

AITC - Asia Information Technology Center *Aug 2025 – June 2026*

At AITC, I contributed to the development and deployment of enterprise web applications, focusing on responsive interfaces, system functionality, and workflow automation. I collaborated with team members and independently delivered solutions to support business operations.

Tân Hòa Chatbot Project: As a new team member, I quickly adapted to the project environment, learned new technologies, and contributed to the development of a high-performance dashboard for visualizing real-time chatbot logs.

Official Website AITC: Developed and deployed the company's official website (aitc-jsc.com) using WordPress, customizing layouts and implementing interactive JavaScript effects to enhance user experience, improve visual appeal, and ensure SEO optimization and responsive design across devices.

QR CODE - ECARD: Developed an event management platform featuring QR code-based guest tracking and personalized E-card generation, leveraging AI to enhance interactive popup designs and improve the user experience for seamless guest check-ins.

Equipment Management System: Independently developed and deployed an IT equipment management system with hardware comparison and automated maintenance tracking. Leveraged AI to optimize hardware analysis and Excel data imports, improving data accuracy and usability.

EDUCATION

University of Technology Ho Chi Minh City (2021 - 2025) GPA: 3.21/4.0
Major: Software Engineering
